Education

D Y Patil International University
BTech - Computer Science Engineering
CGPA: 7.51/10

August 2023 – June 2027
Pune, India

Narmada Convent Higher Secondary School
Class 12th - 81.8%

2023
Barwani, India

Radiant Convent High School
Class 10th - 92.6%

2020
Rajpur, India

Experience

CODTECH IT SOLUTIONS PRIVATE LIMITED
Cloud Software Developer Intern

May 2025 – July 2025
Hyderabad, India

- Configured and managed AWS S3 cloud storage, improving data accessibility and storage efficiency by 85% through secure permissions, versioning, and encrypted storage.
- Implemented AWS CloudWatch monitoring and alerts, increasing system visibility by 75% through real-time metric tracking and automated performance alarms.
- Designed and deployed a multi-cloud architecture using AWS S3 and Google Cloud Run, achieving 90% seamless frontend-backend integration.
- Strengthened cloud security by configuring IAM roles and policies, enabling server-side encryption, and improving data protection and access control by 80%.

Projects

Digital Wallet & Expense Tracker | PHP, MySQL, JavaScript, Bootstrap

Nov 2024

- Developed a full-stack expense tracking application with real-time balance calculation and transaction management, improving financial record accuracy by 85%.
- Designed and optimized a relational MySQL database for users, wallet balances, and categorized transactions, improving data retrieval efficiency by 70%.
- Implemented secure backend functionalities using PHP prepared statements, input validation, and automated recurring payment processing, enhancing transaction security by 80%.
- Built a responsive dashboard with transaction history, balance tracking, and CRUD operations while resolving server-database integration issues using XAMPP.

AI Resume Analyzer | Python, Flask, OpenAI API, SQLite

Jan 2025

- Built an AI-powered resume analysis web application automating ATS-based resume screening and candidate evaluation with 90% faster processing.
- Developed features for PDF resume upload, text extraction, skill identification, keyword matching, and personalized resume improvement suggestions.
- Integrated NLP-based resume analysis and job-role matching to generate structured evaluation reports in real time with improved screening accuracy.
- Designed a responsive frontend using HTML, CSS, and JavaScript along with a Flask backend workflow for resume parsing, AI processing, and database storage.

Skills

Programming Languages: Python, Java, JavaScript, SQL

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, Flask

Databases: MongoDB, MySQL, Firebase

Cloud & DevOps: AWS, Docker, Terraform

Tools: Git, GitHub, Linux, VS Code, IntelliJ

Core Concepts: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Networking

Certifications

Retrieval-Augmented Generation (RAG) with Embeddings and Vector Databases – Coursera [Verify]

DevOps on AWS and Project Management – Coursera [Verify]

Data Engineering: Pipelines, ETL, Hadoop – Coursera [Verify]
