BRIEF SUMMARY

I am a motivated B.Tech undergraduate with a strong interest in technology and innovation. I aim to strengthen my technical, analytical, and problem-solving skills through hands-on projects and internships. My interests include software and web development, data analysis, and applying DevOps and cloud computing principles to create efficient, scalable solutions. I enjoy exploring new tools and technologies to build efficient and scalable solutions.

My goal is to work in the IT industry, applying my knowledge to solve real-world problems and contribute to innovative technology solutions. I seek challenging roles where I can grow professionally, collaborate with teams, and continuously adapt to advancements in information technology.

KEY EXPERTISE

Python HTML, CSS java Cloud Services AWS MySQL

EDUCATION

D. Y. Patil International University, Akurdi B.Tech. - CSE - Cloud Computing CGPA: 7.52 / 10	2023 - 2027
NARMADA CONVENT H.S. SCHOOL, Rajpur 12 th Madhya Pradesh Board of Secondary Education Percentage: 81.80 / 100	2023
Radiant Convent High School, Rajpur 10 th MPBSE Percentage: 92.67 / 100	2020

INTERNSHIPS

CODTECH IT SLOLUTIONS PVT .LTD IT Product & Services Cloud Engineer Key Skills: IAM S3 Security Multi-Cloud Deployment AWS & GCP CloudWatch Monitoring Docker Flask APIs Encryption Completed a structured cloud computing internship focused on designing and implementing a secure multi-cloud architecture using Amazon Web Services and Google Cloud Platform. Designed and deployed a static frontend on Amazon S3 and a containerized Flask-based REST API backend on Google Cloud Run, successfully enabling cross-platform communication between AWS and GCP services. Configured IAM users, roles, and custom policies using AWS Identity and Access Management following the principle of least privilege to ensure secure access control. Implemented server-side encryption, versioning, and public access restrictions for secure cloud storage. Set up real-time monitoring of EC2 performance metrics and automated alerts using Amazon CloudWatch integrated with SNS notifications. Resolved deployment, permission, and service integration challenges through systematic troubleshooting and documentation. Gained hands-on experience in multi-cloud deployment strategies, cloud security best practices, serverless architecture, containerization, and scalable system design.	20 May, 2025 - 20 Jul, 2025
---	-----------------------------

PROJECTS

Money Management System

Mentor: Dr. Somya Dubey | Team Size: 3

Key Skills:

- Database Design (ER Modeling, Relationships, Normalization)
- SQL Queries
- Backend Development using PHP
- Frontend Development (HTML, CSS)
- Database Integration & Server Configuration using XAMPP
- Session Management & Authentication Security
- Modular System Design & Testing

Developed a web-based Money Management System to help users manage income, expenses, and recurring payments efficiently. Designed and implemented a relational database using MySQL to store user accounts, transactions, categories, and auto-debit schedules. Built the frontend using HTML and CSS and implemented backend logic using PHP, enabling seamless communication between the user interface and the database.

Implemented secure user authentication with session management and automatic logout for enhanced security. Designed ER models and relational schemas to ensure proper data normalization and efficient query execution. Integrated features such as real-time balance calculation, categorized transaction tracking, and automated recurring expense deduction. The project demonstrates strong understanding of DBMS concepts, backend integration, and modular web application development.

HEALTH PREDICTIVE ANALYSIS

Team Size: 1

Key Skills:

- Python Programming
- Machine Learning
- Data Analysis
- Data Preprocessing & Cleaning
- Model Training & Evaluation
- Predictive Modeling

Project Link: https://colab.research.google.com/drive/1pti1BmaPbe_wy57qEYnJr6LzoplEw0xO?usp=sharing

Health Predictive Analysis Using Medical Datasets

Developed a machine learning project to predict diabetes and heart disease using Kaggle medical datasets. Applied data preprocessing, trained Logistic Regression and Random Forest models, and evaluated performance using accuracy metrics. Implemented a user-input system for real-time health prediction using Python and Scikit-learn.

Secure Multi-Cloud Architecture Using AWS & GCP

Team Size: 1

Key Skills:

- Multi-cloud architecture,
- backend development using Flask,
- cloud storage management with Amazon S3
- IAM-based access control using AWS Identity and Access Management,
- monitoring with Amazon CloudWatch
- deployment on Google Cloud Run.

Project completed during CODTECH Cloud Computing Internship

Designed and implemented a secure multi-cloud architecture integrating Amazon Web Services and Google Cloud Platform. Hosted a static frontend on Amazon S3 and deployed a containerized Flask backend on Google Cloud Run. Configured IAM users, roles, and policies using AWS Identity and Access Management following the principle of least privilege. Implemented real-time monitoring and alerting using Amazon CloudWatch with SNS notifications. Enabled server-side encryption (SSE-S3), versioning, and blocked public access to ensure secure cloud storage. Containerized backend services using Docker to ensure portability and scalable deployment.

Tech Stack: AWS (S3, IAM, EC2, CloudWatch), GCP (Cloud Run), Python (Flask), Docker, REST APIs, Cloud Security.

ASSESSMENTS / CERTIFICATIONS

DevOps on AWS and Project Management

Key Skills:

- AWS Cloud Fundamentals
- DevOps Lifecycle & CI/CD Concepts
- Infrastructure as Code (IaC) Basics
- Team Collaboration
- Project Management Principles
- Cloud Security Best Practices

Completed an industry-oriented course covering core DevOps practices and project management fundamentals on AWS. Gained practical understanding of CI/CD pipelines, infrastructure automation, cloud deployment strategies, monitoring, and Agile-based project planning. Developed knowledge of managing cloud environments efficiently while ensuring scalability, reliability, and security.

Retrieval-Augmented Generation (RAG) with Embeddings & Vector Databases

Key Skills:

- Retrieval-Augmented Generation (RAG)
- Text Embeddings
- Vector Databases
- Similarity Search
- Semantic Search

Retrieval-Augmented Generation (RAG) using embeddings and vector databases to perform semantic search and similarity matching for enhancing AI model responses.

Data Engineering: Pipelines, ETL, Hadoop

Key Skills: ETL Pipeline Design Hadoop Ecosystem Data Integration Big Data Processing Pipeline Automation

This credential validates hands-on expertise in constructing scalable data pipelines, mastering Hadoop-based architectures, and applying industry best practices for ETL processes—essential skills for modern data engineering roles.

EXTRA CURRICULAR ACTIVITIES

- o volunteer in college activities, Participated in technical workshops and webinars , Collaborated with team members on academic and internship projects, Completed a cloud computing internship project.

PERSONAL INTERESTS / HOBBIES

- o Dance ,travelling, creative writing, trekking, team discussions and knowledge sharing, Coding practice and exploring new programming tools , badminton

IMs

- o WhatsApp - <https://wa.me/919977200390>

PERSONAL DETAILS

Gender: Female

Marital Status: Single

Current Address: silver akshay apartment swapnanagri society
gurudwara colony akurdi pune, gurudwara colony akurdi pune,
Pune, Maharashtra, India - 411033

Emails: 20230802438@dypiu.ac.in , www.prachigupta26@gmail.com

Date of Birth: 26 May, 2004

Known Languages: Hindi , English

Permanent Address: 60 gujri chowk rajpur, gupta medical store
gujri chowk rajpur, Rajpur, Madhya Pradesh, India - 451447

Phone Numbers: +91-9977200390, +91-9977200390
